

# Call for application: Course on Translational Research and Medicine Development

**TMex@Berlin 2023 - Translational Medicine explained**  
**Bayer Pharmaceuticals Headquarters, Berlin – 13-17 November 2023**

## Target audience

PhD/MD students in the second half of their PhD, postdocs and other young scientists involved in biomedical research.

## About the course

The TMex course

- Provides a birds eye view of the medicine discovery & development process
- Raises awareness of obstacles and challenges involved
- Introduces the different players (academia, SME, pharma, regulatory) and career options

## Registration (now open)

First come, first serve. There are only 30 seats, so we recommend applying early. The registration will close when all seats are filled.

## Costs

The course fee is 650€.

A special discounted fee of 500€ applies for EATRIS members, Enlight-ten+ & I2TRON students.

A special discounted fee of 250€ applies for EUPATI fellows, participants coming from EU-13 countries, Africa and Latin America.

To encourage more sustainable travel, a special “green discount” of 75€ will be refunded to participants coming by train from further than 500km.

## What our students say<sup>1</sup>

- “If you have the opportunity to take part in this course – do it. It will fundamentally change your view on how your work as a research scientist can make a difference in the real world outside your lab” (Konstantin Kuhne)
- “Very interactive course with a non-traditional approach. The course reflects the reality of translational medicine: getting a lot of people with different backgrounds to work together as a team” (Miriam Ayuso)
- “It was a difficult decision to leave the lab for 5 days but it is absolutely worth it” (Kevin Ferreira)
- “This course taught me things I didn’t know would even exist. The course inspired me that the PhD is more than just gaining scientific knowledge, but also to use the time to work on my personality” (Inga Hensel)

## Confirmed speakers

**Jenny Fitting**, Head of AAV and Protein Science at Bayer

**Robert Harris**, Professor of Immunotherapy in Neurological Diseases at Karolinska Institutet

**Thomas Steger-Hartmann**, Head of Investigational Toxicology at Bayer

**Piret Baur**, Communications manager at EATRIS

**Marc Kunze**, Senior Project Lead Toxicology at Bayer

**Keith Williams**, retired Director at KW Drug Developments

**Anke Schulte**, Head of Cell & Gene Therapy Research & Preclinical Development at Bayer

**Mike Hardman**, retired VP IMI Collaborations at AstraZeneca

**Jörg Lippert**, Head Pharmacometrics at Bayer

**Özlem Vural**, Expert in Microphysiological Systems at Bayer

**Stefan Bracht**, VP Drug Delivery Innovation at Bayer
